- (e) Teeth that grow at the age of 6-7 months.

4. Circle the odd one:

- | | | | |
|--------------|---------|--------|---------|
| (a) Incisors | Canines | Enamel | Molars |
| (b) Enamel | Cavity | Pulp | Dentine |
| (c) Milk | Sugar | Fish | Egg |
| (d) Bacteria | Fungi | Virus | Cavity |

ANSWERS:

1. Tick the correct option.

- (f) An adult has permanent set of teeth which consists of
(ii) 28 (ii) **32** (iii) 18 (iv) 14
- (g) makes your teeth strong and healthy.
(ii) Vitamin C (ii) Vitamin E (iii) Vitamin K (iv) **Vitamin D**
- (h) Teeth are situated next to incisors.
(ii) Grinding (ii) **Tearing** (iii) Cracking (iv) Cutting
- (i) Tooth decay and cavities are caused by
(ii) **bacteria** (i) virus (iii) fungi (iv) protozoa
- (j) Chickenpox is caused by
(ii) bacteria (i) **virus** (iii) fungi (iv) protozoa

2. Fill in the blanks:

- (f) There are **12** molars present in a set permanent teeth.
(g) A tooth has three parts – crown, **NECK** and **ROOT**
(h) The white and hard outer cover of a tooth is called **ENAMEL**
(i) A **CAVITY** is a hole formed in the tooth due to bacteria.
(j) **CROWN** is the outermost covering of a teeth.

3. Name these:

- (f) The portion of tooth above the gums. **CROWN**
(g) The grinding teeth. **MOLARS**
(h) Hole in the teeth. **CAVITY**
(i) Doctor who looks after your teeth. **DENTIST**
(j) Teeth that grow at the age of 6-7 months. **MILK TEETH**

4. Circle the odd one:

- | | | | |
|--------------|---------------|---------------|---------------|
| (e) Incisors | Canines | Enamel | Molars |
| (f) Enamel | Cavity | Pulp | Dentine |
| (g) Milk | Sugar | Fish | Egg |
| (h) Bacteria | Fungi | Virus | Cavity |
