G K Comprehensive Worksheet

Chapter -1 & 2

P 1 – Most plants grow from seeds, the seeds are usually found inside the fruits, however, the number of seeds and their size vary from fruit to fruit. Plants are very important in our life. Some plants have medicinal values that cure ailments. Like Tulsi, Neem etc. clove is used to cure toothache and sore throat. The juice of Tulsi leaves can be mixed with honey to cure cough and cold. Coriander leaves help to digest food and improve diet. Turmeric paste is used to treat infections. Cumin seeds help to control vomit and diarrhea. Garlic can kill intestinal parasites and keep blood pressure normal. So plants are really important for the plant and all living things. Living things need plants to live. Plants help to clean water too.
